

NM FREIGHT LOGISTICS

Company Profile

NM Freight Logistics Background

NM Freight Logistics, a national and cross border transport company dedicated to providing the best transportation service in Africa. With experienced drivers and latest model equipment, we can deliver your specialised shipments when and how you need it. From its inception in 2001, our mission has been to be a leader in specialised freight transportation, providing fast, efficient and friendly service that is second to none.

Starting with only one truck, the company has expanded to keep pace with the rising need in the transportation industry. Evolving with the constantly changing requirements of today's marketplace, NM Freight Logistics can meet any transportation need that may arise throughout Africa.

1. Company Vision

NM Freight Logistics is a reliable market leader in the road freight and logistics business focusing on the transport sector.

2. Company Mission

We are committed to achieving sustainable growth through the practice of good corporate governance, the provision of excellent customer service, and technologically advanced logistical solutions "at" the highest safety standards.

3. Company Value Proposition

Company Values as a component in the overall strategic framework, is becoming increasingly important in these days of good corporate governance, but also for practical purposes linked to the need to build strong corporate culture to underpin over pin overall company performance. The main outputs from deliberations regarding the Values of the company as a whole is as follows:

Respect: A courteous disposition amongst staff, and towards clients

Integrity: Compliance with company norms and standards

Openness: An environment which encourages good transparent communication, internally and externally

Reliability: The provision of accurate information to all stakeholders, and dependable customer service

Quality: A commitment to quality service and safety at all times.

4. Social Economic Objectives

Profitability is essential in discharging socio-economic responsibility, as well as staying in business. It is a measure of both efficiency and the value placed upon us by our customers. It is the duty of management to prioritise and discharge responsibilities in areas that we value, such as:

Customers

Community

Employees

Stakeholders

5. Health, Safety and Environment

Consistent with our commitment to contribute to sustainable development, we have a systematic approach to HSE Management in order to achieve continuous performance improvement.

We manage HSE matters like any other critical business activity. Targets are set for improvement, measurement, appraisal and report performance. Regular meetings are held for this purpose.

6. Corporate Governance Principles

The Board of Directors, collectively, determines major strategies and policies of the company. The Directors acknowledge that they are responsible for instituting internal control systems that should provide reasonable assurance regarding safeguarding assets, as well as the maintenance of proper accounting records.

7. Black Economic Empowerment

NM Freight Logistics is a wholly owned BEE Company that was established in 2001.

The company was formed to finally provide answers to the seemingly frustrating questions:

"We want to deal with Empowerment Companies; we want to form partnerships with them; we sincerely want to extend a hand of friendship and join hands in building the future of South Africa. But where do we find these Empowerment Companies? Are they professional enough to deal with our situation? How do we get in touch with them?"
